⑨ FARLOW - NOTEBOOK,  
Notes on fungi

Handwritten notes, possibly a list or index, with a vertical line separating the left and right columns. The text is mostly illegible due to fading and handwriting.

Herb. Harvey.  
Alsidium Schottii  
Dyctyophloeae n. s. b.  
Cantarena  
Schott

Ectocarpus alginus

Ptilota hyalina

~~Handwritten notes and signatures, including "B. B. B." and "Schott", are visible below the main text.~~

= *Ascidium Blakelyi*

Baudier,

Bridgman 415.424

Baudier hesitates  
between *Trichostema*  
*repens* and  
*T. equestre*

417. Thinks

this *Stropharia*  
*cotoneus* Quelc.  
which he thinks  
is *Ag. lacrimulosa*  
Fr. but not of  
Bulliard

238. Thinks this  
is *Psilocybe*  
*areolata* but  
does not know the

435. Thinks  
that this is  
Calzhea distorta

Has never seen  
Amanita Frostiana,  
says it is no  
variety of mesocaria

269. Thinks it  
is Boletus elegans

54 here he calls  
Boletus flavus.

172. *Russula*  
*rubra*!

---

331. *Boletus* *felleus*!

---

416. Look this  
up and see if  
there are cystidia  
If there are it  
is not *Corticium*  
but *Truffle*  
Some *Truffle*  
however have  
no cystidia

---

112. Not a form  
of *Corticium*  
~~*Corticium*~~ *anoneus*

445. *Morcanthia*  
*rellus cinereus*  
may be *Canth*  
*sinuosa*

309. *Boletus*  
*subtomentosus*

156. *Boletus*  
*prolificus*

293. 294 & 301  
certainly not.  
*Boletus felleus*,  
quite unknown  
to Bondart,

43 blue. *Psalliotus*  
*Vaillanti* of  
No 32

76. *Psallota*  
*glynicole.*

389. Look up  
*Strophacris*  
*spacudosa*  
The punctations  
of gills however  
resemble *Hyphe-*  
*come* and it  
may be near  
*H. velutina*

403. *Boletus*  
*vermiculus.*

Schramm & Mazé.

Essai de Classification  
des Algues  
de la Côte de France  
par A. Schramm & H.  
Mazé. ~~Basse Terre~~  
~~Imprimerie de l'Ac-~~  
~~adémie~~ 1866

N. 144. Autograph

not printed with  
some descriptions  
not given in the  
edition of 1865

Cazeaux (Guzanne  
française)

N.B. 172 Ed. given Schramm  
& Mazé. 3<sup>d</sup> given  
Mazé & Schramm,  
Schramm being  
then dead.

Ytles of Maze &  
Schramm

Essai de Classifi-  
cation des Algues  
de la Guadeloupe  
par A. Schramm  
et H. Maze. Basse-  
Terre. Imprimerie  
du Gouvernement.  
1865. pp. 52, 4.

Printed on one  
side of page only.  
The only descriptions  
are the notes as  
to different points  
which are repeated  
in the book of  
Maze & Schramm

Callithamnion  
irregular does not  
specially look like  
Thermothamnion  
Synedra in my  
herbarium. The  
filaments are not  
so long any regular  
call. sphaerocum  
~~monstr.~~ has  
coarse filament  
and forms a  
regular ball.

---

Microdictyon  
from Guadeloupe  
Palmer, is M. un-  
ilicatum = M.  
Agardhianum &  
M. Velayanum.

*Jaminia virgata*  
& *J. cubensis*  
are about the  
same.

---

The Bermuda  
*Sudresnegae* are  
*S. purpurifera*  
with terminal  
auxiliary cells,  
and other two  
are new.

---

*Helminthocladia*  
*Schrammii* Cr.  
has trichogyne  
and is not a  
rhizopod plant  
as claimed by  
Agardh. See Agardh

The Calothrix gypsophila  
described by  
Mrs Curtis was  
so named by  
Barnet from a  
small tub sent  
to him by Agardh.  
On seeing a large  
specimen Barnet  
thinks that it is  
probably a distinct  
species but near  
gypsophila,

The Noctua heterogona  
of Barnet & Bohart  
include not only  
forms with hetero-  
cyst but all  
Noctuas having two  
kinds of cells, whether  
in hairs or heterocysts

Large pellicled  
Cm. in Herb. Bonet  
is very small  
and looks like  
*Wangelia pericillata* but it  
is not.

---

Only 100 copies of  
Bonet & Lehoult  
were printed. Of  
Notestegol. 125  
copies.

---

*Brachylidia*, one  
species at least is  
not green but is  
red and related to  
*Wangelia*

*Eupogon* (*Dasya*)  
*mazei*. The specimen  
from Spanish Mount  
Bermuda. Flagg  
in my herbarium  
is this species.

---

*Dasya Hassouriana*  
Mont. is a syno-  
nym of *Dasya*  
*ramosissima*  
Harvey

There is the manu-  
script name of  
*D. simpliciuscula*

Herb. Borner.  
Noctua Leuckner  
in Callis is  
N. verrucosum.

The Noctua scythum  
Braudegeri is a  
mixture of two  
things one of  
which is L.  
figuratum

---

~~Lacys~~ <sup>ocellata</sup> ~~arbuscula~~  
Cooper's Island  
is really a form  
of that species.  
In Cresson's Alg.  
quad. it is called  
L. arbuscula and  
in Cresson's herbarium

Petch.  
*Hyperurpes*  
*inequales*.
